Prévisions : 29 août 2026 – après-midi

Prévisions : 29 août 2025 - soir

Prévisions : 30 août 2026 – matin

A dramatic seascape with a dark, stormy sky and calm water. The sky is filled with heavy, dark clouds, and a faint light source is visible on the horizon, creating a silhouette effect on the water's surface. The water is calm with gentle ripples, and the horizon line is visible in the distance.

Aperçu des dernières sorties de modèles:

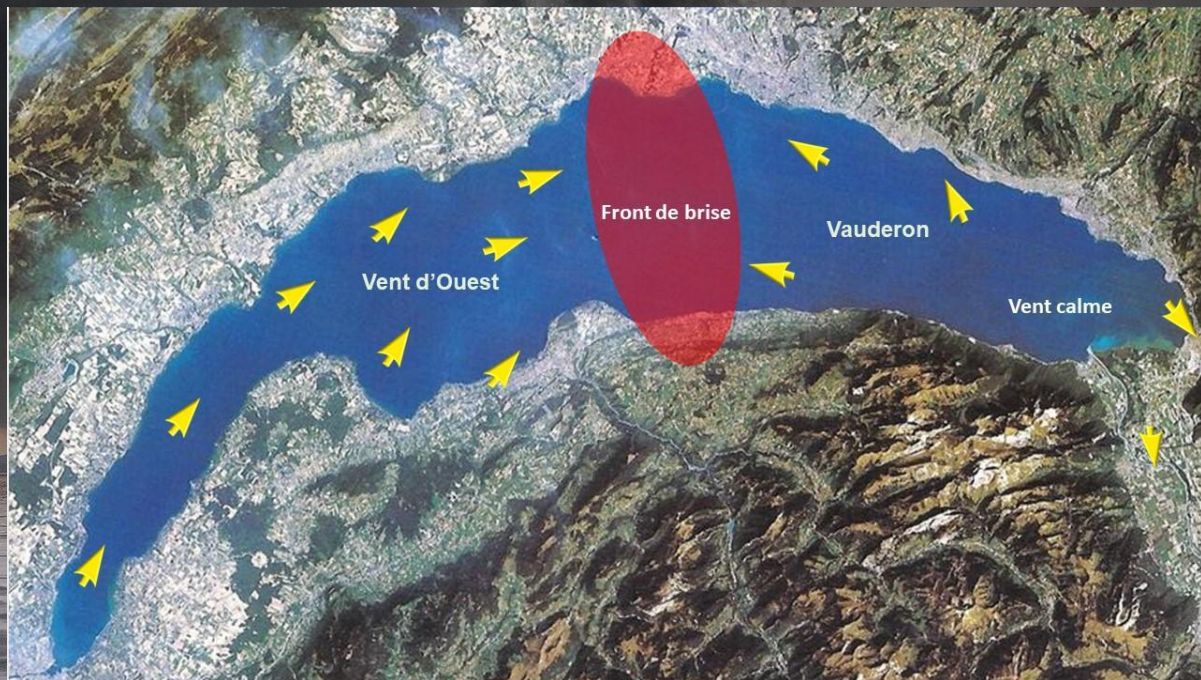

Icon1/Icon2 - Météosuisse

Arome 1.3 HD - Météofrance

A wide-angle photograph of a coastal scene. The sky is filled with heavy, dark, and textured clouds, suggesting an approaching storm. A faint, lighter area on the horizon indicates a break in the clouds. The water is calm with gentle ripples, reflecting the light from the horizon. In the distance, a low-lying coastline with some buildings and hills is visible. Several small buoys are scattered across the water's surface.
